

Manuscript Writing & Poster Presentation Seminar

Synopsis

A critical aspect of the scientific process is the reporting of new results in scientific journals in order to disseminate that information to the larger community of scientists. How can you order and organise the information you wish to present? How can you enhance the chance of your paper being published? Which journal should you submit your research paper? This workshop will take you through the stages of developing a research paper and discuss the common issues scientists face when writing a research paper.

AGENDA
