

## **Violet Hoon Hui Qing**

Senior Consultant, Cardiology, Tan Tock Seng Hospital

### **Research and Innovation Interests:**

- Heart Failure
- Cardiac Rehabilitation
- Preventive Cardiology
- Medtech/Digital Health
- Point of Care Diagnostics

Email: [violet.hoon@nhghealth.com.sg](mailto:violet.hoon@nhghealth.com.sg)

## **Biography**

Dr Violet Hoon Hui Qing is a Senior Consultant in the Department of Cardiology at Tan Tock Seng Hospital (TTSH), where she also serves as Head of Cardiac Rehabilitation Services and Senior Consultant with the Heart Failure Service.

Her core clinical and leadership areas include the multidisciplinary management of heart failure, cardiac rehabilitation, and the integration of digital health innovation into cardiovascular care. Her practice areas span secondary prevention of cardiovascular disease, exercise prescription and tele-rehabilitation, and patient-centered recovery frameworks that bridge acute care to long-term lifestyle management. She actively advances hybrid and home-based rehabilitation models that improve patient accessibility and adherence.

Dr Hoon's training and recognition reflect a sustained commitment to clinical excellence and innovation. A graduate of the Yong Loo Lin School of Medicine (NUS), she completed her NHG Internal Medicine Residency and Cardiology Senior Residency at TTSH, where she served as Chief Resident and PEC Representative. She is a Singapore Biodesign Innovation Fellow (2022), recipient of the NMRC Research Training Fellowship (2023), and NMRC Clinician Innovator Award Investigator (2025). Her team's Heart Track™ project earned the National Healthcare Innovation and Productivity Award (2021) for its automation and IT-enabled rehabilitation platform. By integrating technological tools with empathic communication and multidisciplinary collaboration, Dr Hoon strives to extend cardiovascular health beyond the hospital walls—transforming recovery into a lifelong journey of resilience, empowerment, and self-efficacy.
